ROAD CLOSURE & TRAFFIC GUIDE

May 27th, 2024 | 4 AM to 3 PM

How to Use this Guide to Navigate Road Closures during the Event

Paying attention to traffic conditions can help you avoid road closures and get to your destination faster! To help plan your route around the CapTex Tri's road closures, follow these simple steps:

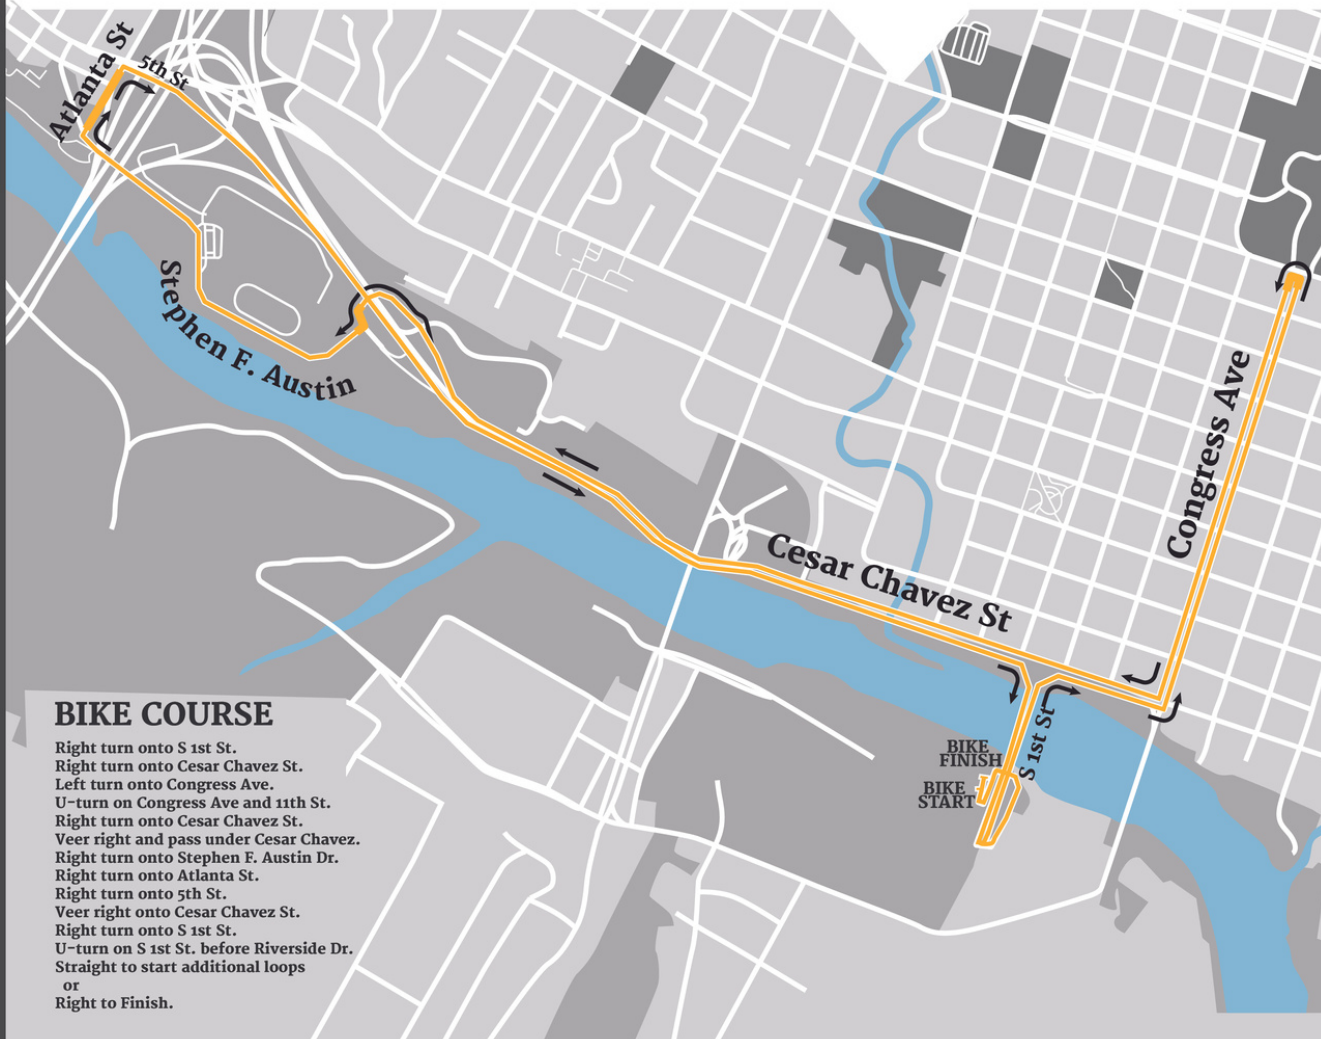

1. Review the planned closures or detours by looking at the maps and road closures attached below.
2. Preview your planned route on a traffic map such as Google Maps or Waze. Note the roads that may be affected by the race's detours and closures by referencing the course maps attached below.
3. Identify how you can use obstruction-free roads such as MoPac, Lamar Blvd., I-35 for north and southbound travel and Ben White Blvd., Oltorf, and 15th St for east and westbound travel.
4. Scan through the detailed road closure list attached to identify closed roads you may need to cross to find an alternative route to avoid delays. Remember that crossing closed roads with a vehicle is highly discouraged and will only be allowed when there are no runners present in major intersections.
5. Park strategically if your trip starts or ends near a section of the course in order to avoid crossing any routes with your vehicle.
6. When ready, plot an alternate route from point A to B based on what you learned from studying the maps and information provided. Plan your route ahead of time using these roads to minimize driving time and potential delays due to closures or detours.
